About Me

Fullstack Engineer with 6+ years of experience(Focused in Frontend) building scalable FinTech, E-commerce, and real-time platforms across Southeast Asia. Specialized in React, TypeScript, and Next.js with strong expertise in WebSocket-based real-time systems and role-based access control. Proven track record delivering production-grade systems, mentoring engineers, and collaborating with cross-functional teams in fast-paced environments.

Technical Skill

Frontend -

React, Next.js, Vue 2/3, TypeScript, JavaScript (ES6+), Redux, Zustand, Vuex, Tailwind CSS, Styled Components, WebSocket (Socket.io)

Backend -

Node.js, Express.js, NestJS, REST APIs, Authentication (JWT, RBAC)

Database -

PostgreSQL, MongoDB, Firebase, Supabase, Redis, MySQL, NoSQL

DevOps & Tools -

Docker, Git (GitLab, Bitbucket), CI/CD (GitLab Pipelines), Agile / Scrum

UI/UX & Testing -

Tailwind CSS, Bootstrap, Styled Components, Cypress, Jest, Responsive Design

Education & Certifications

Pearson Level 5 HND Diploma in Computing(Web & Software Development) Litan
Myanmar, Yangon(2017 - 2020)

My Some Personal Project

V-VCall (Real-Time Video Platform)

Architected a responsive WebRTC application using React and VideoSDK, implementing complex device-switching logic and multi-role participation modes to ensure high-quality, low-latency video communication. [Link Here](#)

Sales & Competitor Analytics Platform

Built a full-stack BI tool with RBAC and Price History tracking using PostgreSQL and Drizzle ORM; implemented dynamic KPI dashboards to drive market intelligence. [Link Here](#)

Restaurant POS & Management System

Built a real-time POS using Next.js 15 and Supabase, featuring RBAC, Zod-validated forms, and automated QR/receipt generation; optimized for tablet performance to streamline end-to-end restaurant operations. [Link Here](#)

Professional Experience

Meta World Technology Co.,LTD. / *Senior Frontend Developer* |

Apr 2024 – Feb 2026 , Bangkok, Thailand

Technologies: React, Vue 2/3, TypeScript, Redux, Vite, WebSocket, Git

- Led frontend architecture for a production-grade C2C trading platform supporting thousands of concurrent users.
- Implemented real-time order flows using WebSockets (Socket.io), ensuring low-latency updates and consistent state synchronization.
- Designed secure authentication and authorization flows for financial transactions and user access control.
- Collaborated closely with backend, product, and QA teams to define technical roadmaps and delivery timelines.
- Mentored 3+ junior developers through code reviews, best practices, and architectural guidance.

Clickr Media Co.,LTD. (Equatorial Marine Fuel) / *Senior Fullstack Developer* |

Feb 2023 – Mar 2024, Myanmar

Technologies: Next.js, Node.js, Express, MySQL, MongoDB, Redis, Docker, GitLab

- Architected and delivered a marine fuel logistics platform for the Singapore market, automating ship fuel validation and compliance workflows.
- Developed RESTful APIs to synchronize fueling data across Business Central systems and international shipping fleets.
- Improved data accuracy and reduced manual operational processing by ~30% through automation.
- Implemented Redis caching and optimized database queries to improve API response times.
- Led weekly deployments and authored technical documentation to support long-term maintainability.

YC Fitness Co.,LTD. / *Senior Frontend Developer* | Part Time

Jan 2022 – Dec 2023, Myanmar

Technologies: React, TypeScript, Tailwind CSS, WebSocket, Git

- Developed a full-scale fitness platform featuring real-time member messaging, trainer hiring, and subscription management.
- Implemented WebSocket-based real-time chat, improving user engagement and interaction.
- Optimized frontend performance and ensured 100% responsive design across mobile, tablet, and desktop devices.
- Maintained stable weekly deployment cycles with minimal production issues.

Innovix Solution Co., Ltd. / *Senior Frontend Developer*

Oct 2021 - Jan 2023, Myanmar

Technologies: ReactJS,NextJS,PUG,GULP,Bootstrap,Tailwind

- Led the end-to-end frontend development of a high-traffic e-commerce platform using ReactJS and NextJS, managing approximately 90% of the frontend architecture from ideation to production.
- Engineered a seamless checkout and shipping workflow, integrating multiple Online Payment Gateways and secure third-party APIs to ensure a frictionless transaction experience.
- Developed a complex Customer Loyalty & Rewards module, increasing user retention by implementing personalized business logic and dynamic UI components.
- Orchestrated weekly deployment cycles, collaborating with cross-functional teams to ensure zero-downtime releases and rapid bug resolution in a fast-paced environment.
