About Me

Senior Frontend Developer with 6+ years of experience specializing in **architecting scalable, high-performance Fintech and E-commerce solutions** across Southeast Asia . Expert in the **JavaScript ecosystem (React, Next.js, Vue, and Node.js)** and building production-grade backends with **NestJS** and **ExpressJS**. I leverage a versatile database stack—including **MongoDB, Supabase, and MySQL**—to ensure data integrity for complex, real-time systems. **Proven track record** in leading cross-functional teams and mentoring developers to deliver clean, maintainable **TypeScript** code.

Technical Skill

Frontend -

ReactJS, NextJS, VueJS, TypeScript, JavaScript (ES6+), Vite, Webpack, Redux, Zustand,Vuex, Tailwind CSS, Bootstrap , Socket.io and other trending library.

Backend -

NodeJS, ExpressJS, NestJS , RESTful API Development.

Database -

MongoDB, Firebase, Supabase, Redis, MySQL, PhpMyAdmin, NOSQL

Specialized -

C2C Payment Gateways , Fintech Loan Systems , Real-time WebSocket Data , Authentication/Authorization (RBAC)

Infrastructure -

Git (GitLab/Bitbucket), Jira, Agile/Scrum Methodologies

UI/UX & Testing -

Tailwind CSS, Bootstrap, Styled Components, Cypress, Jest, Responsive Design

Education & Certifications

Pearson Level 5 HND Diploma in Computing(Web & Software Development) Litan
Myanmar,Yangon(2017 - 2020)

Key Achievements & Technical Impact

1. Engineered Real-Time High-Concurrency Transaction Systems

Achievement: Successfully launched a high-performance C2C payments marketplace and trading platform with real-time order updates.

How Obtained: Utilized Socket.io and WebSockets to engineer live order flows, coupled with robust state management to ensure data consistency across a multilingual user base.

2. Optimized Regional Enterprise Data Synchronization

Achievement: Streamlined maritime logistics by synchronizing critical fueling data between the Singapore Business Central site and international shipping fleets.

How Obtained: Developed sophisticated RESTful APIs and complex validation logic to automate the tracking of fuel types, tank capacities, and vessel stay durations.

4. End-to-End Ownership of Commercial Platforms

Achievement: Independently architected and delivered 90% of the frontend for a comprehensive E-commerce platform.

How Obtained: Leveraged ReactJS and NextJS to build a full-lifecycle business flow, including an automated Loyalty Program, shipping management, and secure checkout integrations

5. Secured Complex Fintech Ecosystems

Achievement: Designed a secure, multi-tier Loan Bank Card system involving complex financial calculations and three distinct user perspectives (Admin, Shop, Owner).

How Obtained: Implemented Role-Based Access Control (RBAC) and secure transaction history tracking using NextJS and ExpressJS.

Professional Experience

Meta World Technology Co.LTD / *Senior Frontend Developer* |

Apr 2024 – Feb 2026

Technologies: ReactJS, Vue3,Vue2, Redux,Vuex, Vite, Socket.io,Git

- Led the frontend development for a production-grade C2C trading platform, implementing live order flows via WebSocket.
- Managed project timelines and technical roadmaps through active discussion with cross-functional teams.
- Architected secure Authentication and Authorization flows and high-performance, mobile-first transaction portals.
- Mentored junior developers by conducting code reviews and guiding technical implementation

Clickr Media Co.LTD (Equatorial Marine Fuel) / *Senior Fullstack Developer* |

Feb 2023 – Feb 2024

Technologies: NextJS, ExpressJS, NodeJS, MySQL, MongoDB, Redis, Docker, GitLab.

- Engineered a specialized marine fuel service project for the Singapore market, automating ship fuel validation and logistics logic.
- Synchronized operational data between Business Central sites and shipping fleets to maintain real-time fleet consistency.
- Developed RESTful APIs and automated notification systems while managing weekly deployment cycles via GitLab.
- Authored comprehensive technical documentation and provided direct mentorship for junior engineering staff.

YC Fitness Co.LTD / *Senior Frontend Developer* |

Jan 2022 – Dec 2023

Technologies: ReactJS, Socket.io, Tailwind CSS, Git

- Developed a full-scale Gym Fitness platform featuring real-time member chatting, trainer hiring processes, and member plan upgrades.
- Optimized platform performance and ensured 100% responsiveness across all device types.
- Maintained high deployment standards through consistent weekly deployment schedules.

Idea Offshore Co,LTD / *Senior Fullstack Developer* |

Nov 2022 – Jan 2023

Technologies: NextJS, ExpressJS, MySQL, GitLab

- Architected a multi-tier Loan Bank Card system featuring specialized dashboards for admins, shops, and card owners.
- Developed complex financial calculation logic for shop-to-customer transfers and transaction history tracking.
- Led RESTful API development and facilitated technical mentorship for the team.

The Ninth Art Technology Co,LTD / *Software Engineer* |

Mar 2020 – May 2021

Technologies: VueJS, AngularJS.

- Spearheaded the critical migration of a legacy betting game project from AngularJS to VueJS.
- Developed secure payment integrations (Alipay) and responsive game table modules for a high-concurrency gaming environment
